On-Site sessions for the MLCMS lab in the winter 2023/24

MOST IMPORTANT:
All meetings (on-site and on-line) will be live-streamed and recorded. The entire course can be completed on-line, all video and zoom links will be posted on Moodle. Still, every two weeks, there will be on-site QnA sessions for people who want to discuss in person.

Dates and times

All on-site meetings will be in the room **specified in the TUMOnline schedule:**

https://campus.tum.de/tumonline/pl/ui/$ctx/wbTvw_List.lehrveranstaltung?pStpSpNr=950696340

The zoom links will be posted on Moodle.

Live streaming of lectures

1. I will wear a microphone for the live-streaming or recording. If somebody in the room asks a question, I will repeat it, so that people joining online will be able to hear it.
2. You will not be recorded on camera during the lectures. I will enable it on my laptop, but it always only faces myself and the projected screen behind me.
3. All live streamed sessions will be uploaded and made available on Moodle afterwards. Different from the general lecture videos, which are available publicly, the live-stream recordings will be password protected and only available to registered students.
